Bronze Treatment

Revive effectively with little downtime

Bona Floor Treatment Program consists of 3 different treatments depending on the condition and use of the floor: Gold, Silver and Bronze.

The Bronze Treatment is a new effective way of keeping floors beautiful, bringing dull wooden floors back to life in an instant. This quick revival delivers remarkable results between floor renovations, and the floor is ready to be walked on after as little as half a working day.

Using the Bona PowerScrubber machine with the specially formulated Bona Deep Clean Solution, the wooden surface is effectively deep cleaned, so even the toughest dirt, grime and scuff marks are removed. The floor is then ready for a fresh layer of polish, oil, or Bona Wax Oil Refresher, depending on the type of finish.

The floor will look close to new, in just a matter of hours!
