✔ Top speed sanding

✔ High durability

✔ Extremely smooth surface results

✔ Grit range for all sanding steps

# Bona Abrasives 8300

Top speed to a premium surface

Bona®

# Bona Abrasives 8300

Top speed to a premium surface

Premium abrasive made of an optimal zirconium mix for a perfect balance between aggressiveness and surface finish. In addition to its excellent speed, the 8300 is also extremely long lasting and delivers a remarkably smooth end result.

Bona 8300's unique grit composition allows it to grind the floor evenly without fibre ripping, while lasting up to 3 times as long as the closest competitors. It is also available in different grit sizes for high performance in every sanding step. The 8300's premium performance means fewer belts required, significantly higher speed, and a smoother end surface.

Key Benefits

- Fast sanding process
- High durability
- Extremely smooth surface results
- Antistatic properties for minimised clogging and optimal dust extraction
- Grit range for all sanding steps

Sanding particles are close together and more evenly distributed.

The surface that has been sanded by Bona Abrasives is smoother, more even, with visibly less fibre ripping.
