

THE **SECRET** BEHIND

- ✓ 30% faster cut
- ✓ 50% longer lasting
- ✓ Better results

BONA **GREEN 8600** CERAMIC ABRASIVE

Unique composite for better sanding

EVEN SANDING

The more even a grit surface is on the abrasive, the easier it is to achieve a smoother surface. Bona abrasives display a significantly more even grit structure.

GRIT DISTRIBUTION

With a uniform distribution of grit, sanding results are smoother and more even. Bona abrasives display a significantly more uniform grit distribution.

The **Secret** Behind Bona Green 8600 Ceramic Abrasive

Bona Green 8600 Ceramic Abrasives are long-lasting and tough in action, yet gentle to the wood with very low fibre ripping. The unique mixture of ceramic and aluminium oxide enables impressive performance.

It provides 30% faster abrasion and is 50% more long-lasting than other premium abrasives. With the introduction of the new Bona Green 8600 Ceramic Abrasive, a faster, smoother and safer sanding process will be your new standard.

BELTS

Available sizes:

200 x 750mm
250 x 750mm

Grit:

36 - 120

Grain Type:

Ceramic and aluminium oxide

Coating:

Electrostatically, closed coat

Backing:

Y-weight cloth, polyester

Bonding:

Synthetic resin

DISCS

150mm
178mm
