

Superior

- ✓ Extremely strong and durable
- ✓ Faster sanding process
- ✓ Perfect for coarse sanding
- ✓ Minimises scratches

Bona Abrasives 8700

Durable strength for a faster process

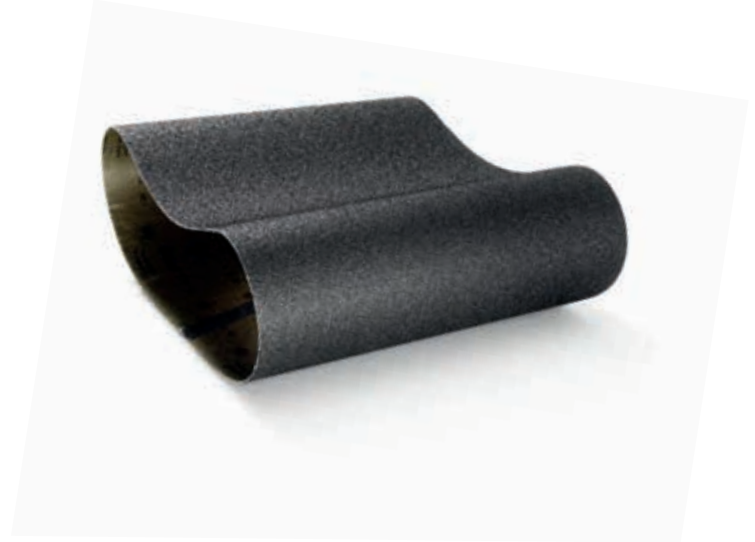

Bona Abrasives 8700

Durable strength for a faster process

Superior abrasive made of ceramic grits for easy removal of hard lacquers, carpet residue and for flattening highly uneven timber. The unique grit composition delivers exceptional sanding aggressiveness perfectly balanced with gentleness to the wood floor, which results in a smooth surface without fibre ripping and deep scratches.

The ceramic grits deliver remarkable sanding speed while ensuring that the long-lasting abrasive stays sharp over time. The 8700 also allows coarse sanding to begin with a finer grit of 50, skipping a step in the sanding process to save time and money. It is the only abrasive in the market that allows sanding down to bare wood using the Bona Power Drive.

Key Benefits

- Extremely strong and durable
- Faster sanding process
- Perfect for coarse sanding
- Minimises scratches
- Ability to sand back down to bare wood with Bona Power Drive

Ability to sand back down to bare wood with Bona Power Drive and Bona FlexiSand 1.5

Technical Data

	Belts	Rolls
Available sizes:	200 x 550mm 200 x 750mm 250 x 750mm	203mm x 25m 254mm x 25m 305mm x 25m
Grain Type:	Ceramic and aluminium oxid	Ceramic and aluminium oxid
Coating:	Electrostatically, closed coat	Electrostatically, closed coat
Backing:	Y-weight cloth, polyester 36+50	Y-weight cloth, polyester 36+50
Bonding:	Synthetic resin	Syntetic resin
Coarse sanding:	On hard wood: 36+50	36+50
