

ULTRA  
MATT

COMBINE WITH BONA TRAFFIC HD RAW

Bona Classic UX is a perfect match for all Bona topcoats, achieving desired sheen and durability depending on the floor demand. When Bona Classic UX is combined with e.g.,

the ultra matt Bona Traffic HD Raw, it delivers that trendy, natural looking wood floor, requested by many home and commercial floor owners today.

A SUSTAINABLE CHOICE

In general, floor renovation means climate savings. For example, renovating 50m² rather than installing a new floor equals the CO<sub>2</sub> emissions produced by driving from Paris to Berlin, a 1100 km car trip.

The Classic UX primer itself fulfills the requirement of EMICODE EC1 Plus, A+ and GreenGuard Gold.

**Bona®**

Established in 1919, Bona is a world leading innovator with a unique system for resilient floor treatment. Through subsidiaries and distributors we have local presence in more than 90 different countries enabling us to be close to our customers and craftsmen.

Our long commitment and passion for floors enable us to offer lasting, sustainable results that meet floor needs for professionals and floor owners alike.

A **STRONG** FOUNDATION FOR LASTING **FLOORS**

**Bona Classic UX** – The primer with better user experience

**Bona®**

BONA  
CLASSIC  
UX

- ✓ EASY TO ABRADE
- ✓ GREAT BUILD
- ✓ EVEN COLOURATION

## FOR A **STRONG** FOUNDATION

To create a stunning wood floor surface and preserve the floor investment, a primer is the key. Even though the topcoat is the layer closest to your customers feet, starting the coating process using a compatible, high performing primer lets the floor reach its full potential. For many years,

Bona have been offering a full range of premium primers, all designed to match the various Bona topcoats. Now we're adding the all-new Bona Classic UX to the primer family, with a similar coloration as the Bona Classic but with a significantly improved user experience.

## A **PRIMER** WITH **LASTING ADVANTAGES**

The new Bona Classic UX offers easy abradability with minimal grain raising, great filling ability and a stable colouration. It has a fast-drying time and is easy to apply making it a fantastic product to work with.

### EASY TO ABRADE

To secure a smooth end-result, the Bona Classic UX has great abradability properties, using Bona Scrad or Screens. The balanced viscosity ensures low grain raising which minimizes the need for abrading, speeding up the overall process.

### FAST DRYING

To minimize the process time, Bona Classic UX has a drying time of only 1-2 hours. This means that abrasion and top-coating can start earlier than before and you as a contractor can save time by remaining at the jobsite after the first as well as second application layer.

STRONG  
ADHESION

### GREAT FILLING ABILITY

The balanced viscosity of Bona Classic UX provides an easy applied product with excellent filling properties. It evens out the wood surface, prior to application of the topcoat creating a strong adhesion to the wood and the topcoat, securing a long, durable floor life.

EVEN  
COLORATION

### A LIGHTER WARM SHADE

Having no tannin reaction, the Bona Classic UX leaves a natural light wood coloration that remains over time. Combine it with Bona Traffic HD range to create a tough and durable floor surface with a spectrum of design possibilities - from a full gloss floor to a true raw wood look.

### A FULL RANGE OF BONA PRIMER

Depending on the need for wood floor coloration, Bona offers a variety of primers. From white to amber, the range is now extended with Bona Classic UX.
